

Understanding the Importance of Long-Term Investing

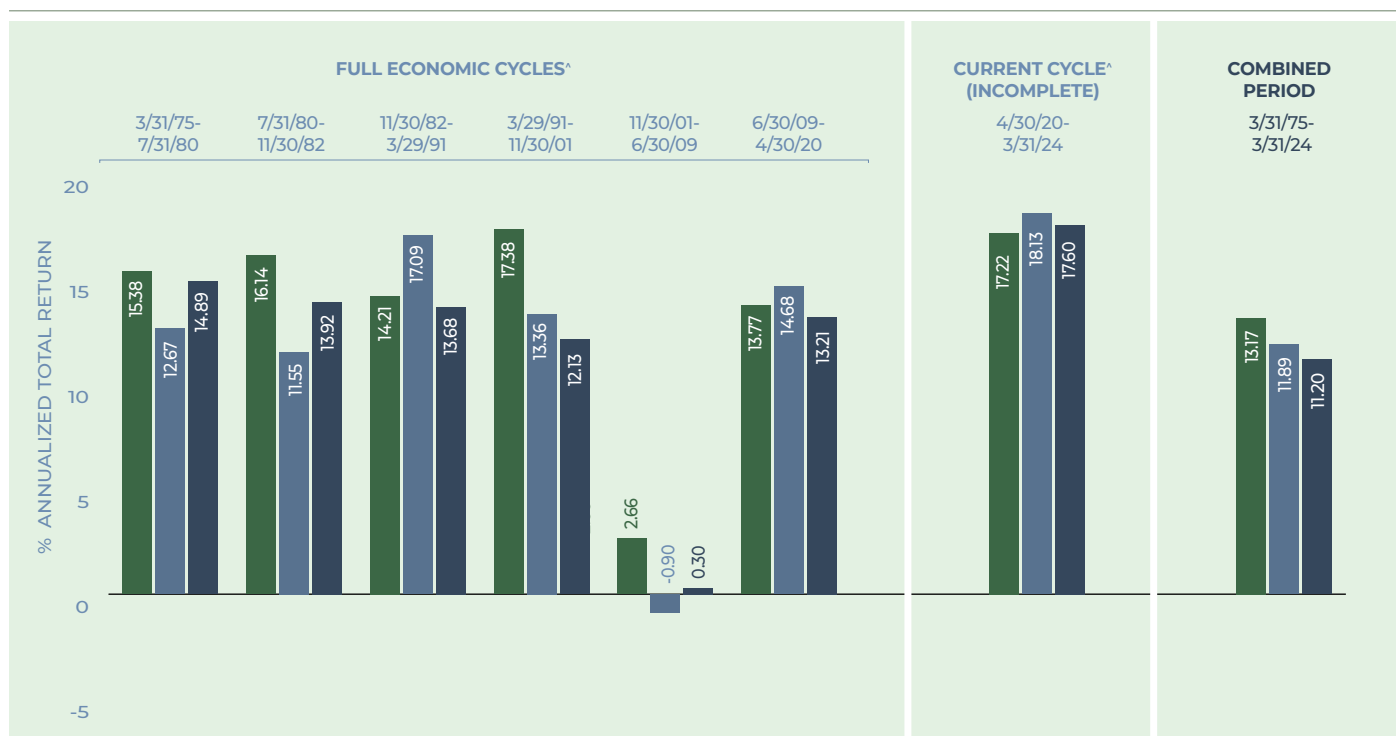

WHAT IS A FULL ECONOMIC CYCLE?

When Mairs & Power talks about the advantages of holding through a “full economic market cycle,” we are referring to the business cycle fluctuation between contraction and expansion, also called recession and recovery. Investors who enjoy growth opportunities during times of expansion must consider and prepare for times when the economy inevitably contracts. Mairs & Power’s portfolios are designed to help preserve capital over full cycles.

The periods in this chart are called “trough to trough.” The beginning point of each period marks the start of a recovery following a recession. During the period, a “peak” is reached and then another contraction begins. The end of the period marks the low point prior to the next recovery starting, and is also referred to as a “trough.”

A recessionary period is a period of significant decline in widespread economic activity spread lasting more than a few months, normally visible in real GDP, real income, employment, industrial production and wholesale-retail sales.

Mairs & Power Growth Fund Outperformed 4 of the Last 6 Full Economic Cycles

- Mairs & Power Growth Fund
- S&P 500 TR Index
- Lipper Multi-Cap Core Funds Index

Data is for the time periods indicated. Performance for other periods may differ, possibly significantly.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. For most recent month-end performance figures, please call Shareholder Services at 800-304-7404.

S&P 500 TR Index is an unmanaged index of 500 common stocks that is generally considered representative of the U.S. stock market.

Lipper Multi-Cap Core Funds Index measures performance of the 30 largest mutual funds that invest in a variety of capitalization ranges, without concentrating 75% or more of their equity assets in any one market capitalization range over an extended period of time. One cannot invest in an index.

Morningstar Large Blend Category: Large-blend portfolios are fairly representative of the overall US stock market in size, growth rates and price. Stocks in the top 70% of the capitalization of the US equity market are defined as large cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of US industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index.

Risks: All investments have risks. The Fund is designed for long-term investors. Equity investments are subject to market fluctuations and the Fund's share price can fall because of weakness in the broad market, a particular industry or specific holdings. Investments in small and mid-cap companies generally are more volatile. International investing risks include among others political, social or economic instability, difficulty in predicting international trade patterns, taxation, and foreign trading practices and greater fluctuations in price than U.S. corporations.

⁴Source of Economic Cycle Periods: Public Information Office, National Bureau of Economic Research, Inc., 1050 Massachusetts Avenue, Cambridge, MA 02138

Recessionary periods shown in the chart on the reverse are defined by the National Bureau of Economic Research (NBER) as recessionary periods in the U.S. economy. The NBER defines a recession as a significant decline in economic activity spread across the economy, lasting more than a few months, normally visible in real GDP, real income, employment, industrial production and wholesale-retail sales. The NBER also calls recessionary beginning and ending points, peaks and troughs by month.

The Fund's investment objective, risks, charges and expenses must be considered carefully before investing. The summary prospectus or prospectus contains this and other important information about the Fund and they may be obtained by calling Shareholder Services at 800-304-7404 or visiting www.mairsandpower.com. Read the summary prospectus or prospectus carefully before investing.
